

Milestone Kite™

Simple, secure and scalable
cloud video security.

Takes care of security so you can focus on business

Looking for a simple security solution that doesn't take up your time? Milestone Kite is the answer.

It's cloud-based so is easy to run, accessible from anywhere, and you don't have to worry about updates and maintenance. It's also an open solution, giving you the freedom to choose from more than 6,000 camera models and a variety of extra analytic and access control functions to complement its core functions.

And like all Milestone products, it comes with our proven expertise, support and global partner network.

Key benefits

Simple

Spend your time on
what really matters

Focus on your business, not security. Milestone Kite is easy to set up, manage, and update; and it can be monitored from anywhere.

Secure

Keep your
business safe

Enjoy peace of mind. Protect your people, property and assets with a reliable video solution to safeguard against theft, vandalism and more.

Scalable

Expand your
solution with ease

Choose from 6,000+ devices, expand to new sites, and add extra access control and analytics functions.

Cost reducing

Save on
lifecycle costs

From a low up-front investment to low costs throughout the lifecycle of the product, Milestone Kite saves your business time and money.

Top features

Video security

Don't miss a thing. Have a complete overview of one or multiple sites from a single interface that can be monitored from anywhere. Search hours of video in seconds, get notifications and document incidents with the click of a mouse.

Access control

Keep unwelcome visitors out. Control who can enter your site with easily configured users, schedules and access levels as well as door card management. It's also easy to create rules and alarms to trigger notifications so you can respond proactively to intrusions.

Analytics

Make better business decisions based on data, not guesses. You can track visitor and vehicle movements, including with heat maps, count people, do post-event investigation with artificial intelligence and much more.

Fits your site requirements

Single site

This is an ideal plug-n-play option for smaller businesses, institutions, and venues. You can install it yourself, and don't need to worry about updates, cybersecurity, and maintenance – these are automatic.

Multisite

Businesses with two or more sites can keep a clear and centralized overview of their security. It is also easy to expand your security solution to new sites or temporary ones such as construction sites or social venues.

Hybrid

Combine Milestone Kite with on-premises Milestone XProtect software for the best of both worlds. It's ideal if you already have an on-premises solution but wish to expand your security coverage to dispersed sites with minimal effort or investment.

Why choose a Milestone solution?

Proven security track record

Rely on our 25 years of experience, with solutions proven in 500,000+ customer sites.

Global partner network

Access the expertise and support of our 11,000+ resellers and integrators.

Cybersecurity

Stay protected with encrypted data and regular security updates.

Open platform

Future-proof your video installations with software that can be customized as you grow.
