

NetAXS-123[®]

NetAXS-123 enables you to securely manage your system anywhere there's an Internet connection - simply log on and you're ready to go. The user-friendly design makes it simple to install and easy to operate. The system easily adapts to existing IT infrastructure and methods so as your needs grow, NetAXS grows with you.

In addition to all the benefits of traditional access control, NetAXS allows you to easily add doors with 1 or 2 door add-on boards with the flexibility of managing the system in 3 different host modes. You can manage NetAXS-123 using the embedded browser, MAXPRO[®] Cloud's secure cloud infrastructure, or WIN-PAK[®]'s integrated security suite.

Features and Benefits

Protect Your Investment

- Embedded, cloud and software hosted capability from one panel that integrates with WIN-PAK and MAXPRO Cloud
- Add additional doors, video, intrusion, and mobile application support as your business needs expand without replacing panels

Protect Your Business

- Securely manage system from anywhere with an internet connection
- Encrypted communication between panel and hosts
- Ensure secure and trusted connections to the panel with security certificate capability

Save Money

- Reduce chargeable false alarms with supervisor mode
- Protects investment and can grow as your needs expand
- Avoid annual software maintenance fees with embedded software
- No dedicated PC costs with embedded web client

Save Time

- Decrease training time with intuitive interface and faster workflow
- Embedded interface helps minimize troubleshooting and service calls
